AHSB Room  
2200/2201  
Zoom

Sunil Kripalani, MD, MSc is Professor of Medicine at Vanderbilt University Medical Center, where he directs the Center for Health Services Research and serves as Vice President for Health System Sciences. He previously founded the Center for Clinical Quality and Implementation Research and continues lead several research and training programs in implementation science and learning health systems, dedicated to improving health care delivery and health outcomes by optimizing quality, value, equity, and patient-centered care. He is an applied implementation scientist and has expertise in improving transitions of care for hospital patients, with a focus on health literacy, social determinants of health, care coordination, and medication safety.
