

The Case of Value in Learning Health Systems

Learning health systems promise to advance evidence-based practices in health systems by meeting local priorities and developing scalable models for operations, quality improvement, and research. This discussion will demonstrate how LHS approaches create value for all stakeholders including healthcare systems (e.g., partners, collaborators, patients, payers, policymakers etc.). We hope you will join us to learn and build a shared vision for what Learning Health Systems can achieve.

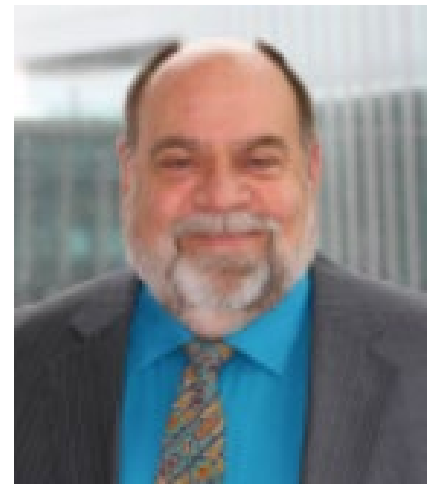

Panelists

Liza M. Creel, PhD, MPH

Katy Trinkley, PharmD, PhD

Mark Gritz, PhD
