## Format of Data Dictionary

Each standard field that may be found in MarketScan data is defined on the following pages. Seven columns of information are present for each field.

### Name

The short (2 to 8 character) name of the variable.

### Long Name

Long name, or label of the variable. For example, the variable containing information about the type of provider who rendered the service is labeled "Provider Type."

### Description

A definition of the data in the variable.

### Data Types/Formats

CHAR: Character

NUM: Integer Numeric

FLT: Decimal Numeric (CSV only)

DATE: Date (CSV only)

### Valid Contents

The meaning of each valid term in the field. For example, the standard values for SEX (Gender of Patient) are 1 and 2, with 1 meaning male and 2 meaning female.

Some variables have longer lists of standard values. For those, a separate attachment (which follows the alphabetical listing) has been created.

### Notes

<b>MANFNME</b>	<b>Manufacturer Name</b>	Identifies the name of the company that markets the product. The name appearing in this field corresponds to the FDA-registered labeler name identified by the five-digit labeler code on the NDC number. Therefore, names appearing in this field will include distributors and repackagers in addition to original manufacturers.	CHAR(50)	Character 50 variable, left justified	-	RED_BOOK

MASTFRM	Master Form Code	Groups similar dosage forms under a single, broader category. For instance, all metered-dose inhaler products with the following form codes are grouped under a master form code "MDI"	CHAR(3)	-	-	RED_BOOK
METSIZE	Metric Size	The 2008 RED BOOK quantity of product in the package in metric units or number of items. This represents the size of the package bought by the pharmacy and does not induce how the drug was dispensed. The last two digits of the NDC code indicate the package size.	CHAR(30)	-	-	RED_BOOK

NDCNUM	National Drug Code	The full 11 digits of the Food and Drug Administration registered number. The first nine digits identify the manufacturer and product name. The last two digits identify the package size.	CHAR(11)	Each character = 0-9	As coded on claim. Zero-filled to 11 characters. "00000000000" (eleven zeroes) is the missing/unknown value for NDCNUM. ORGBKCD	<b>Orange Book Code</b>	Supplies FDA's therapeutic equivalence code for multi-source drug products, if applicable. Codes beginning with "A" signify that the product is deemed therapeutically equivalent to other products containing the same active ingredient in an identical amount and dosage form. Codes beginning with "B" indicate that bioequivalence has not been confirmed.	CHAR(3)	-	-	RED_BOOK

PRDCTDS	Product Category Description	Text lookup value for PRODCAT (Product Category Code)	CHAR(30)	Character 30 variable, left justified	-	RED_BOOK
PRODCAT	Product Category Code	Products in the database are coded with their prescription and trade-name status. This permits extraction of all records in a particular category, such as prescription generics, or branded OTCs. Products of repackagers are coded separately to accommodate specialized processing.	CHAR(2)	-	-	RED_BOOK
PRODNAME	Product Name	Supplies the name given to the product by the manufacturer. Since each package size of each strength is maintained in the database as a separate drug record, this name may appear in several other records.	CHAR(50)	Character 50 variable, left justified	-	RED_BOOK
REACTDT	Date Reactivated	The date on which the NDC code was reactivated	NUM(4)	mmddy10.	New in 2017.	RED_BOOK

SIGLSRC	Single Source Indicator	Identifies the product as trademarked, patent-protected drug generally available from only one source. A "1" in this field indicates that the product is a single-source drug. A blank in this field indicates that the product is available from more than one source. In those occasional instances when branded products are cross-licensed (e.g., Prinivil and Zestril), each carries the single-source indicator.	CHAR(1)	-	-	RED_BOOK
STRNGTH	Strength	Supplies the strength of the product. Consistent with FDA nomenclature, the order in which strengths are listed corresponds to the alphabetical order of the active ingredients. Please note that for products containing more than three active ingredients, this field is left blank. For combination products, a hyphen separates the individual strengths of the active ingredients. For example, the strength of acetaminophen with codeine is expressed as 325 mg-30 mg.	CHAR(30)	-	-	RED_BOOK
