Presents

Health Equity Seminar Series Part 2: A Focus on Social Determinants of Health

Responding to Adverse Childhood Experiences (ACEs) in Nurse-Family Partnership: An Equity-Oriented Approach to Health Promotion Services

Susan Jack, PhD, BScN, RN
Professor, School of Nursing
McMaster University

Learning Objectives:

- To describe the formative research methods used to develop a nursing intervention to identify and respond to intimate partner violence within the context of the Nurse-Family Partnership program
- To discuss how the principles of trauma-and-violence informed care can be applied to identify and understand individual's experiences of ACEs or current traumas
- To outline strategies for evaluating equity-oriented approaches to health care
